JOHN BRUNNING,

NURSERYMAN

Somerville Nurseries

SOMERVILLE, VICTORIA, AUSTRALIA

A WARNING

is given Customers against

Cheap Trees

for the following reasons:—

After going to the expense of clearing ground and attending to the trees probably for five years, and then finding that they are not what is wanted, it will be necessary either to regraft or cut them out altogether, and lose another five years' time.

It is therefore cheaper in the first place to give a fair price and secure a good article

VEGETATION DISEASES ACT, 1896

Certificate of Examination

I Hereby Certify that the undermentioned
trees and plants in the Nursery the property of

Mr. JOHN BRUNNING, of Somerville

have this day been examined and found free from
disease. This Certificate is granted for a period
of six months from date hereof, unless rescinded
upon further examination, in accordance with
Clause 3 of the General Regulations under the
above Act.

Dated this 22nd day of April, 1917.

EDWIN MEEKING,

Inspector.

INTRODUCTION

In presenting this season's Catalog, I desire to thank my Customers and friends for the liberal support they have given me during the past seasons. I also trust by giving careful attention to business and by placing the goods at the lowest price, consistent with good quality, to still uphold the confidence and support given me.

The "SOMERVILLE NURSERIES" are so well and favourably known throughout Australia, Tasmania, and New Zealand, and through merit they are now making a creditable record of their productions, where soil and climate are favourable to fruit-growing, that it is needless to go into detailed account of how the Nurseries have grown to their present dimensions.

The Nurseries have been established for 51 years, and are situated at Somerville, on the Stony Point Line, 34 miles from Melbourne. Visitors and intending planters are cordially invited to come at any time and I will be most happy to show them over the Orchards and Nurseries. If word is sent beforehand, they will be met at the station with conveyance and thereby saved a walk of $1\frac{3}{4}$ miles.

PACKING

We specialise in this department, having a Special Staff doing this all the season, and can guarantee to pack to carry anywhere, whether by boat or rail

Amateurs unacquainted with the different varieties should state for what purpose the fruit is required, the nature of the soil, situation, etc., then if the selection is left to me, I will send the trees best suited to those purposes and conditions.

Some of your friends may be interested in orcharding. Would they like a Catalog? It is a pleasure for us to send them one if you will let us know.

Hints to Customers

CUSTOMERS are requested to kindly state clearly which route they wish the Goods sent, and also write distinctly their names and addresses.

Unknown correspondents will kindly furnish a Melbourne reference.

Customers are specially requested to order at once, if possible, after receiving my reply to their enquiries, as delay may cause trouble, and I do not hold any sorts unless distinctly ordered.

Customers are kindly requested to add a few more names to their lists, as it is impossible to keep all sorts in stock, but in no case will the supplementary list be made use of where the other can possibly be supplied.

Customers are kindly asked to state whether the railway station to which they want the goods consigned is prepaid or not

Responsibility.—My responsibility of damages of any kind, such as rough usage, pilfering, loss during transit, etc., cease when the goods are delivered at the Somerville Railway Station or at the Melbourne Wharves.

Customers are kindly requested when ordering to state whether they should be addressed as Mr., Mrs., or Miss.

All Post Office Orders payable at Somerville.

Explanation of Prices.—Not under 100 at 100 rate. Under 100, or over 3 of a sort at dozen rate, unless 12 or more of a sort is taken, then at 100 rate. Under 3 of a sort at single tree rate.

Somerville Nurseries, Somerville, Victoria, Australia

Cross Fertilisation

IT has been proved now that certain sorts of Apples and Pears require other varieties planted near to fertilise them. In Apples, it has been proved that Jonathan will not set its fruit unless other varieties are planted near it. In planting large numbers of Jonathans, I would recommend that every fourth and eleventh rows should be planted with the sort required for fertilisation purposes.

SEE SMALL PLAN BELOW

1	2	3	4	5	6	7	8	9	10	11	12	13	14
			Row cross fertilisation purposes							Row cross fertilisation purposes			

The sorts I would recommend to fertilise Jonathan are Rymer, Stone Pippin, Reinette du Canada, Alfriston, Chandler, Sturmer Pippin, Munroe's Favorite.

In Pears, such sorts as Keiffer's Hybrid, it is quite as necessary to plant other varieties near it for the same purpose. Twyford Monarch, Howell, Duchess de Angouleme, and Beurre Clairgeau are sorts that will do.

Directions for Planting

After your ground is ploughed, measure off the required distances that you intend to plant your trees apart. Dig the holes a good three feet wide and five or six inches deep—**no more**—with the centre of the hole fully two inches higher than the edges. Put in about a kerosene tin of rotten manure, then plant your tree—with the strongest roots the side from which the strongest winds blow; spread the roots out to their fullest extent, and see that none are twisted in the hole. Fill in with loose earth and tramp firmly around them.

Directions for Pruning

Trees Just Out of Nursery Bed.—Apples, Pears, Plums, Cherries, Quinces, Prunes, cut back to four or five buds from where they were cut back last, always leaving the end bud on the outside.

Two Years and After.—Cut out to one and two limbs on each that was cut back last year. Cut from a quarter to one half the wood back according to the strength of the last season's wood. Do not cut the short spurs off, as they are fruit spurs—if not this year's they are the groundwork for future years.

Explanation of Second Year Pruning.—If your tree has four limbs when it comes from the nursery, it will probably have ten or twelve the second year, which would be too many to leave, so cut the two longest side shoots away on some and only one on others, taking care to leave the second one when another limb is desired.

Some of your friends may be interested in Orcharding

WOULD THEY LIKE A CATALOG?

It is a pleasure for us to send them one if you will
let us know

To Plant Lovers

It is a pleasure to be able to satisfy our Customers' needs, so if at any time you wish to get

Shrubs, Plants, Roses, Seeds, etc.

we will gladly get them, and at the same prices that you would be charged elsewhere.

We do not wish to make profit on these, as your interests are our interests, and our aim is to see our customers satisfied, because we firmly believe that

A SATISFIED CUSTOMER IS OUR BEST ADVERTISEMENT

We only send out the best of seeds, and take every possible care to protect our customers, but it must be borne in mind that we give no warranty as to description, quality, or productiveness, and we accept no responsibility in regard to the crop, or failure of the crop, there being too many causes, known and unknown, which prevent good seeds from germinating, and it is only under these conditions that all seeds are sold. If the purchaser does not accept the seeds on these terms, they must be returned at once.

ALMONDS

Per 100, 60/-; per doz., 9/-; each 1/-

From Seed Bed, not Balled, 3/- per doz.

THESE NOTES

are written for the purpose of giving Fruitgrowers, especially beginners, the benefit of years of practical experience in planting for market and export. The best varieties to keep, too, are the well-known varieties that you see quoted in England and elsewhere.

The varieties I would recommend are for export purposes.

CLEOPATRA or NEW YORK PIPPIN
FIVE CROWN or LONDON PIPPIN
JONATHAN
MUNROE'S FAVOURITE
REINETTE DU CANADA
ESOPUS SPITZENBURG
RYMER
ROME BEAUTY
STURMER PIPPIN

It is not much use planting sorts that are not known, as they will not bring the prices of well-known sorts.
